   A. Mini Rex and Angoras  
   B. Polish and Angoras  
   C. Netherland Dwarf and Angoras  
   D. Britannia Petite and Angoras

3. It is believed that the domestic cat of today originated from the________.
   A. Panthera  
   B. African Wild Cat  
   C. Jungle Cate  
   D. European Wild Cat

4. Which breed of cat has a delicate coat and can have bald spots if combed to harshly?
   A. Cornish  
   B. Maine Coon  
   C. Burmese  
   D. Birman

5. Terrestrial adult is a stage in a life cycle of a?
   A. Salamander  
   B. Turtle  
   C. Snake  
   D. Lizard

Housing and Management: 5 Questions
6. The primary gas resulting from fish and food waste in an aquarium is?
   A. Ammonia  
   B. Oxygen  
   C. Carbon Dioxide  
   D. Hydrogen

7. The most common place to find a tick on a dog?
   A. Lower abdomen  
   B. Head  
   C. Lower back  
   D. Shoulder

8. A __________, generally, should not be kept with dogs of other breeds.
   A. Chihuahua  
   B. Poodle  
   C. Doberman Pinscher  
   D. None of the above

9. Can sunlight kill most bacteria?
   A. Yes  
   B. No
10. Finches should be kept in cages that are of what shape?
   A. Circular  
   B. Rectangular  
   C. Square  
   D. The shape does not matter

**Anatomy and Physiology: 10 Questions**

11. Where does oxygen exchange in the gills of a fish?
   A. Alveoli  
   B. Air Sacs  
   C. Lamella  
   D. None of the Above

12. The average cat weighs __________ pounds.
   A. 4-6  
   B. 5-10  
   C. 6-12  
   D. 7-14

13. The top layer of skin is called the?
   A. Sebaceous  
   B. Epidermis  
   C. Dermis  
   D. Subcutaneous

14. What is the average temperature of a dog?
   A. 98.6F  
   B. 96.6F  
   C. 101F  
   D. 99.8F

15. What is the purpose of mucous membranes that line the eyelids and are attached to the upper part of the eyeball?
   A. Protect eye  
   B. Produce tears  
   C. Remove foreign material  
   D. Maintain shape of eye

16. Most fish have at least one vertical ________ fin along their back.
   A. dorsal  
   B. caudal  
   C. adipose  
   D. anal

17. What is the average temperature of a rabbit?
   A. 88-90F  
   B. 97-98F  
   C. 90-92F  
   D. 99-102F

18. Vocal sounds of a cat are produced by _________________________________.
   A. Air expanding the larynx  
   B. Contracting the diaphragm  
   C. Vibrating the uvula  
   D. Changes in the tension of muscles

19. One function of the gizzard in birds is to grind food with?
   A. Saliva  
   B. Acids  
   C. Carbohydrates  
   D. Grit

20. Fish have taste buds located in or on up to how many body parts?
   A. 4  
   B. 5  
   C. 6  
   D. 7
Diseases and Parasites: 10 Questions
21. Canine brucellosis will cause dogs to exhibit all but which of the following symptoms?
   A. abortion                   C. failure to whelp
   B. frothing at the mouth     D. swollen testes

22. Swelling of the thyroid gland is a sign of?
   A. Goiter                    C. Infectious canine hepatitis
   B. Pasteurellosis            D. Ulcer

23. Mange is a disease caused by?
   A. Mites                     C. Ticks
   B. Mosquitoes                D. Lice

24. If there is a bacterial infection under the skin a (n) _________ is likely to develop.
   A. Abscess                   C. Stroke
   B. Adystocia                 D. Colic

25. Birds suffer from the following mites except?
   A. Scaly face and leg mites  C. Nest mites
   B. Feather mites            D. Red mites

26. Aeromonas and Pseudomonas are bacteria that cause infection in reptile?
   A. Digestive System         C. Nervous System
   B. Skin                     D. Circulatory System

27. Which of the following is not a fungal organism that causes ringworm in dogs?
   A. Microsporum canis        C. Microsporum eglaris
   B. Microsporum gypseum      D. Trichophyton mentagrophytes

28. What disease is the most common cause of death in rabbits?
   A. Snuffles                  C. Enteritis
   B. Mastitis                  D. Weepy Eye

29. All of the following are noninfectious diseases except:
   A. camylobacteriosis        C. cataracts
   B. heart disease            D. arthritis

30. Birds suffer from the following mites except?
   A. Nest Mites                C. Red Mites
   B. Feather Mites            D. Scaly Face and Leg Mites

Breeding and Genetics: 10 Questions
31. The process of giving birth to puppies is known as?
   A. Docking                   C. Cropping
   B. Hatching                  D. Whelping
32. The basic unit of heredity is?
   A. Sperm               C. Ova
   B. Genes               D. Mutation

33. Cats may meow excessively and crouch during which cycle?
   A. Estrus               C. Ana-estrus
   B. Met-estrus           D. Pro-estrus

34. What type of animal has Amniotic eggs?
   A. Mammal               C. Fish
   B. Bird                 D. Amphibians

35. Average gestation period of a dog is?
   A. 58 – 68 days         C. 50 – 55 days
   B. 30 – 32 days         D. 71 - 80 days

36. Most rabbits become sexually mature at_____ of age, depending upon the breed.
   A. 2 to 5 months        C. 5 to 8 months
   B. 3 to 6 months        D. 6 to 9 months

37. With fish, the release of eggs by the female and fertilization with sperm released by the
    male?
   A. Gestation            C. Spawning
   B. Ovulation            D. Fertilization

38. In birds the urinary and sexual openings are in the ________.
   A. Cloaca               C. Collop
   B. Ceca                 D. Copra

39. __________ is the nutrient needed to grow new tissue and repair old tissue.
   A. Calcium              C. Sulfur
   B. Protein              D. Vitamin D

40. A female dog WILL NOT accept mating with a male dog during what time?
   A. Estrus               C. Estrous
   B. Proestrus            D. Gestation

Nutrition: 10 Questions
41. Which of the following vitamins is important for successful reproduction?
   A. A                     C. D
   B. B                     D. E

42. What is a major source of energy in animal feeds?
   A. Calcium              C. Minerals
   B. Carbohydrates        D. Vitamins
43. Due to the ability of a cat to synthesize these vitamins, they are not required in a cat’s diet.
   A. B and C    C. C and K
   B. A and D    D. A and K

44. According to the N.R.C. the average dog should have a diet that consists of _____% fat.
   A. 23    C. 19
   B. 25    D. 21

45. This breed of cat is unable to store body fat and thus needs to eat frequently to maintain its body temperature?
   A. Sphynx    C. Colorpoint Shorthair
   B. Oriental Shorthair    D. None of the above

46. Cats have a high requirement for?
   A. Protein    C. Calcium
   B. Minerals    D. Carbohydrates

47. The following supplement provides the most usable calcium in a dog’s diet?
   A. Yeast    C. Bonemeal
   B. Milk    D. Cod liver oil

48. Which type of seeds for birds contains the most carbohydrates?
   A. Oil Seeds    C. Fruit Seeds
   B. Cereal Seeds    D. Peanuts

49. All of the following are macrominerals except:
   A. calcium    C. sulfur
   B. phosphorus    D. zinc

50. Component of feed used to maintain animal body temperature and used when animals are exercised?
   A. Vitamins    C. Carbohydrates
   B. Minerals    D. Water
2011 Small Animal Care
Written Test Key

2011 ND State FFA Convention  
Small Animal Care Event  
Team Problem Solving Activity-50 Points  
Page 1 of 2

**Instructions:** Work together with your teammates to complete the following sales problems. There will be five points available for each correct answer you calculate. Please use the attached sheet of problem numbers and choices to select your answers from. Then place your answers on the scantron sheet provided. Each team only needs to turn in one sheet. The points earned on this activity will be added to your team score (that is, the top three folks on your team whose scores comprise your team score). Good luck.

**Situation:** You work for Pet World and a customer purchases the following items. You must calculate the total cost for each item, the appropriate sales tax, and the total amount of the bill. Assume that sales tax is 6%.

*Pet World*  
*557 Honeydew Lane*  
*Podunk, ND 58888*

Team Problem Solving Activity-50 Points

Instructions: Cross reference the answers you arrive at to the problems on pages one and two of your Team Problem Solving Activity with the choices provided on this document. Then clearly mark the letter of your choice on the Scantron Sheet provided. Be sure to use a number two pencil to do so. YOU ONLY NEED TO HAND IN THE SCANTRON SHEET WITH YOUR CHAPTER NAME AT THE CONCLUSION OF THIS PART OF THE CONTEST. GOOD LUCK.

Problem 1:
A. $4.95  C. $9.90  B. $14.85  D. $5.95

Problem 2:
A. $9.51  C. $3.17  B. $6.34  D. $12.68

Problem 3:
A. $72.60  C. $75.20  B. $84.70  D. $88.55

Problem 4:
A. $53.13  C. $5.31  B. $16.29  D. $0.53

Problem 5:
A. $93.86  C. $89.08  B. $141.68  D. $104.84

Problem 6:
A. $715.20  C. $1989.15  B. $1439.80  D. $1430.40

Problem 7:
A. $17.88  C. $8.94  B. $26.82  D. $19.00

Problem 8:
A. $1553.33  C. $2268.53  B. $2827.28  D. $1939.80

Problem 9:
A. $140.65  C. $1406.49  B. $93.30  D. $98.63

Problem 10:
A. $2628.74  C. $2094.99  B. $1354.79  D. $2069.99

**Breed Identification Scantron Sheet Codes**

**INSTRUCTIONS:** Use the following codes listed in the table below to indicate your choice of the breed shown in the PowerPoint presentation. Be certain to darken the circles completely. If you need to change your answer, also make sure that you ERASE the darkened circles thoroughly, so the machine will read your new answer correctly. Each correctly identified breed is worth four points.
