

# CTE Reporting

(The following should be submitted to your administration on specific dates as noted below and throughout the guide.)

**1. Master School Schedule: Pulled from PowerSchool on Sept 30**

This is used to verify the classes that are being taught this school year. ND CTE only reimburses approved Agricultural Education courses for grades 9–12.

**2. Course Outline: Units taught for the current school year. Due September 30**

A course outline identifies what you are teaching for the current school year and helps you as a guide for instruction. As a state-funded program, there are minimum expectations of topics and student competencies that should be covered in each class. Reference the class frameworks on the CTE website for these. The details required and suggested format to submit to ND CTE is located on page 22 & 23.

**3. Advisory Committee Form SFN (15256): Due June 30** <https://www.nd.gov/cte>

The completed form should list the members for the current school year, all questions are answered, and the form is signed by the chairperson.

**4. Advisory Committee Minutes: Due June 30**

To receive state funding from ND CTE, your agricultural education program is **required** to complete two advisory committee meetings each year. This can be a stand-alone committee for just your agriculture program, or it can be a shared committee with other CTE programs in your school. Quality minutes need to be taken by the instructor at each meeting and submitted to CTE at the end of each year. For samples and all the information, you need on running a successful advisory committee, go to: <https://www.nd.gov/cte/forms/docs/AdvisoryCommitteeGuide.pdf>
